About Me

I am a motivated software developer passionate about IT and software development. With strong practical experience gained through education and project work, I specialize in web and mobile development, application development, game development, and system administration. I am open to work both independently and in teams, taking responsibility for large-scale projects.

Technical Skills

Frontend: HTML, CSS, Lua, JavaScript, Flutter (Dart)

Backend: SQL

UI Development: SAP UI5

Tools & Platforms: Git, SAP BTP, Azure SSO, Microsoft Planner, Linux Server Management, Discord Bot Management

Projects

A-Kristal Auto Repair Website

- Designed and implemented a fully responsive website for a logistics and auto repair company
- Developed an interactive booking system to streamline customer service

- Ensured mobile-friendly design and clear information architecture

Technologies: HTML, CSS, JavaScript

The screenshot shows a service selection page for A-KRISTAL. At the top, there's a blue header bar with contact information: email (autokristaloy@hotmail.com), phone (+358 413171393), address (Sulantie 28 B 4, 04300 Tuusula), and a logo for 'A-KRISTAL'. Below the header, a navigation bar includes 'Etusivu', 'Meistä', 'Palvelut', and 'Ajantasainen' (AJANTASAINEN). The main content area has a title 'Valitse palvelu' (Select service) with a magnifying glass icon. It displays six service options in boxes:

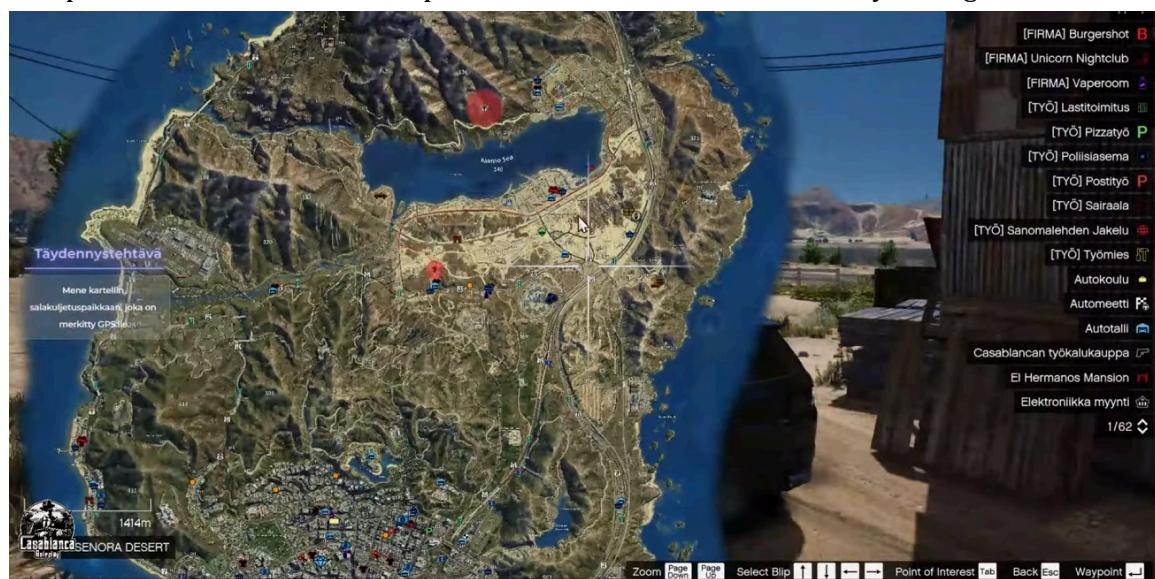

Olijinvaihto 89 €	Jarrujen huolto 149 €	Renkaanvaihto 25 €
Moottorin diagnostiikka 75 €	Maaraaikaishuolto 199 €	Muita palveluita Tarjous

A blue 'Seuraava' (Next) button is at the bottom of the service list.

At the bottom of the page, there's a blue footer bar with 'Yleiset' (General) and 'Yhteystiedot' (Contact information), along with links to 'Etusivu' and 'Sulantie 28 B 4'.

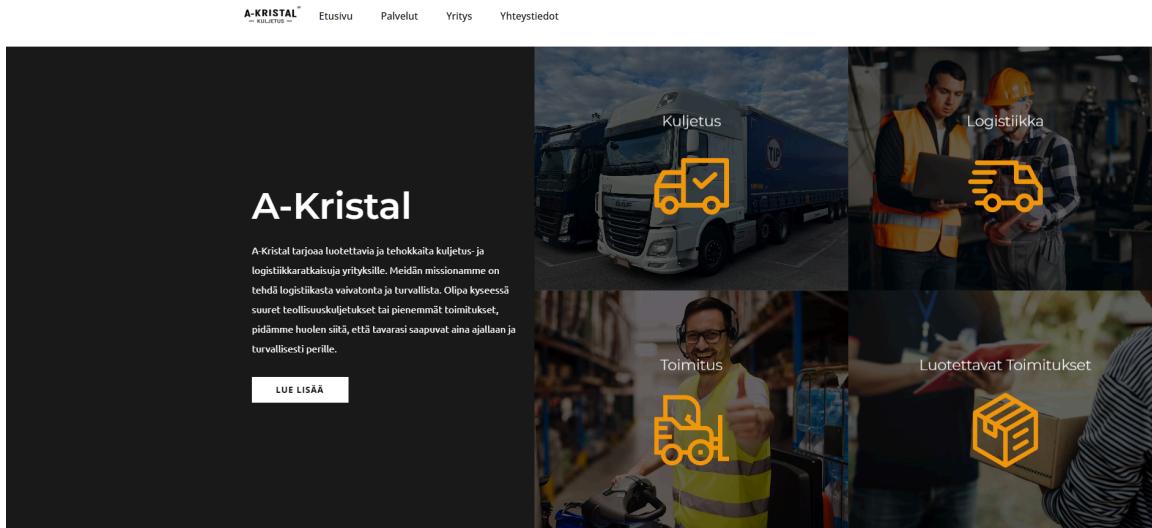

FiveM GTA RP Server - Casablanca RP

- Independently designed and developed one of Finland's largest FiveM GTA roleplay servers
- Developed game logic using Lua and SQL
- Managed server infrastructure and community growth to over 5,000 Discord members
- Responsible for technical development, maintenance, and community management

A-Kristal Transport & Logistics

- Created a professional website for transport and logistics services
- Focused on clear service presentation and customer information
- Implemented modern design reflecting the company's professional brand

SAP Fiori Leave Calendar Application - Islet Group Oy

- Developed Fiori-based leave calendar application as part of development team
- Implemented OData APIs for HANA database connectivity
- Integrated Azure Single Sign-On for secure authentication
- Version control management with GitLab and test environment deployment

ProposalFlow - Professional Proposal-to-Payment SaaS

I developed a fully functional SaaS platform that solves payment workflow problems for service businesses. The system enables clients to create professional proposals, capture electronic signatures, and accept payments instantly through Stripe integration.

- Stripe payment processing with secure checkout
- Electronic signature capture

- Professional PDF generation
